

Spectrasonics

Keyscape

KEYSCAPE

COLLECTOR KEYBOARDS

1. UPDATE KEYSCAPE

Open Keyscape and click the Spectrasonics logo in the upper right corner to see the splash screen. If it says **Updates are available!**, click **GET UPDATES**, log in, close your DAW, and run the installer inside the Spectrasonics Updater folder.

2. FIND STEAM AND BACK UP

On a Mac, open Finder, choose **Go > Go to Folder**, type ~/Library and open Application Support > Spectrasonics > STEAM. On Windows it lives in C:\ProgramData\Spectrasonics, a hidden folder, so turn on **Show Hidden Files and Folders** first. Copy STEAM > Keyscape > Settings Library > Patches > User to another drive.

3. ADD THE PATCHES

Copy the artist's whole patch folder (the folder of .prt_key files inside Presets) into **STEAM/Keyscape/Settings Library/Patches/User**. Open Keyscape and click the circular **Refresh** arrow at the bottom of the Browser. Then click **User** at the top of the Browser to see the new patches.

4. TEST OUT YOUR NEW PRESETS

You are good to go! Play through the sounds and see what inspires you. Don't forget to tag the artist on social media if you share something. They would love to hear how you are using their presets.

Troubleshooting Tips

[Spectrasonics Knowledgebase](#)

[Keyscape Guide: Saving and Managing Patches](#)

Patches dropped loose into the User folder will not show up. Keep them inside their folder.

Some patches use keyboards that only come with the Full Keyscape install, not Lite.
