

Apple

Logic & MainStage

1. UPDATE YOUR APP AND SOUNDS

In the App Store, click **Updates** and install any Logic Pro or MainStage update. Then open the app and choose **Logic Pro > Sound Library** (or **MainStage > Sound Library**). Click **Manage Packs**, then **Get All**. Several of our sounds need these Apple samples.

2. BACK UP FIRST

In MainStage, choose **File > Save Concert As** to keep a copy of your concert. In Logic Pro, back up your projects, for example with Time Machine.

3. LOAD YOUR PATCHES

MainStage: open your concert, or choose **File > New** and pick a template. Click **Edit** (top left). Drag only the .patch files (not the sample folders) from **3 - Patches** onto the Patch List, then choose **File > Save**. **Logic Pro:** choose **File > Open** and open the .logicx project in **1 - Logic Pro Session**. To keep a sound, select its track, open the Library, and click **Save**. It appears under **User Patches**.

4. TEST OUT YOUR NEW PRESETS

You are good to go! Play through the sounds and see what inspires you. Don't forget to tag the artist on social media if you share something. They would love to hear how you are using their presets.

Troubleshooting Tips

Check Apple's user guides for their official troubleshooting tips.

A sound is silent or asks for missing files? Finish the Sound Library download in step 1, and keep Spotlight on.
