

Spectrasonics

Omnisphere 3

1. UPDATE OMNISPHERE 3

These presets will not open in Omnisphere 2. Click the Spectrasonics logo (upper right) to see the splash screen. If it says **Updates are available!**, click **GET UPDATES**, log in, and run the installer it downloads.

2. BACK UP YOUR SOUNDS

On a Mac, open Finder, choose **Go > Go to Folder**, type ~/Library and open Application Support > Spectrasonics > STEAM. On Windows it lives in C:\ProgramData\Spectrasonics, a hidden folder, so turn on **Show Hidden Files and Folders** first. Copy the Patches > User and Multis > User folders from STEAM > Omnisphere > Settings Library to another drive.

3. INSTALL THE .OMNISPHERE FILE

Click the **Utility Menu** (the three-line button, upper left) and choose **Install .omnisphere**. Pick the .omnisphere file inside 1 - Presets (it may be in a subfolder). A report shows what is inside. Click **OK**. In the Patch browser, open the **Directory** menu and choose **Sharing**. Multis are under **Sharing** in the Multi browser.

4. TEST OUT YOUR NEW PRESETS

You are good to go! Play through the sounds and see what inspires you. Don't forget to tag the artist on social media if you share something. They would love to hear how you are using their presets.

Troubleshooting Tips

[Spectrasonics Knowledgebase](#)

[Omnisphere 3 Guide: Adding Sounds](#)

Use the .omnisphere file, not the loose .prt_omn files. It carries every sound.

No Sharing folder? Click the circular Refresh arrow at the bottom of the browser.
