

Spectrasonics

Omnisphere 2

1. UPDATE OMNISPHERE 2

Open Omnisphere and click the Spectrasonics logo in the upper right corner to see the splash screen. If it says **Updates are available!**, click **GET UPDATES**, log in, close your DAW, and run the installer inside the Spectrasonics Updater folder.

2. FIND STEAM AND BACK UP

On a Mac, open Finder, choose **Go > Go to Folder**, type ~/Library and open Application Support > Spectrasonics > STEAM. On Windows it lives in C:\ProgramData\Spectrasonics, a hidden folder, so turn on **Show Hidden Files and Folders** first. Copy STEAM > Omnisphere > Settings Library > Patches > User to another drive.

3. ADD THE PATCHES

Copy the artist's whole patch folder (not the loose .prt_omn files) from the Presets folder of your download into **STEAM/Omnisphere/Settings Library/Patches/User**. In Omnisphere, click the circular **Refresh** arrow at the bottom of the Patch browser. Open the **Directory** menu, point to **User Directories**, and choose **User**. The artist's folder shows up as a category.

4. TEST OUT YOUR NEW PRESETS

You are good to go! Play through the sounds and see what inspires you. Don't forget to tag the artist on social media if you share something. They would love to hear how you are using their presets.

Troubleshooting Tips

Check out the Spectrasonics Knowledgebase for their official troubleshooting tips.

Have Omnisphere 3? These patches work there too.

STEAM on another drive?
Double-click the STEAM shortcut in the Spectrasonics folder.
